

Western Plant Hire

Western Plant Hire's core business is to provide heavy earthmoving equipment and services throughout Australia and Asia.

At Western Plant Hire we provide plant, logistic support and personnel for clients involved in mining, oil and gas, civil works, crushing, screening, project management, construction of bulk earthworks and marine civil works.

Our reputation for innovation and unwavering focus on achieving excellence in the field of works has led to our company being identified as a leader in Western Australia in the earth moving industry.

With more than 220 machines and qualified operators available Western Plant Hire can provide our clients with a variety of equipment and expertise for all their heavy earthmoving and project requirements throughout Australia.

Our goal is to over deliver to clients expectations whilst providing excellent cost effective service.

Plant and Equipment Hire

We take pride in the quality of our fleet of equipment. Our late model low hour machines can be supplied on a fully wet or dry basis depending on your needs.

All Plant and Equipment supplied by WPH is regularly maintained by our experienced maintenance personnel.

With our extensive fleet WPH has the ability to support your long term projects as well as your daily adhoc requirements.

Western Plant Hire can supply specialist solutions to meet the needs of our clients including the design and customization of equipment, for example we are in discussion for the design and implementation of a cable reeler on a Cat988 Loader and are currently installing a rock hammer to a 988 for a client in the North West.

Our clients include ;-

- Saipem DBNGP (80 Units of plant and operators fully maintained)
- McConnell Dowell DBNGP,
- Rio Tinto,
- BHP,
- FMG,
- Leighton,
- Downer EDI and more.

Crushing and Screening

Our Jaws, Cones and Screens are some of the most up to date plant of its type in Australia; we work with the Manufacturer and their agents to ensure that development of these machines exceeds our client's requirements.

We are able to utilise feed material of up to 600mm with a surveyable aggregate product as fine as -2mm, you can be assured that the agreed specification material is produced on time and on budget.

Operations Include

Whim Creek- Crush screen and feed 8,000 tonne daily minus 25 mm aggregate 24/7.

Mindarie Regional Council - Crush 800,000m³ of limestone and place as surcharge over Stage 2 Phase 1 landfill.

Marinas and Seawalls

Our specialist experience in the provision of services in the construction of Marinas and Seawalls is second to none, our award winning construction at Quinns Rock have ensured the we have built, constructed and maintained beach fronts for some of the Western Australia's most prestigious ocean front facilities.

If you need a Seawall, Breakwater or Marina built, then we are the number one choice in Western Australia.
